

# ABOUT SOTON MARXISTS

World events have progressed rapidly over the last few years. It's common knowledge that the economy is now facing the deepest crisis of all time, corruption has spread as an epidemic in politics and war is breaking out in one place after another. How do we interpret all these phenomena? Is there a solution to all these problems or are we in the beginning of an endless suffering?

As International Marxists we understand these events as fundamentally the outcome of opposing class interests, and offer an alternative to the present crisis in society. To get rid of exploitation, oppression, war, unemployment, bad and insufficient education and healthcare we need to fight for Socialism.

The fight needs to be Global. The crisis is not a problem of a few isolated countries but is affecting the whole World. It's affecting countries which are seemingly stable, like Britain, where it is becoming clearer to growing amounts of people that the situation is not improving, but getting worse. In order to fight for Socialism, we need to firstly educate ourselves in the ideas of Marxism which will be our main tool in our struggle against Capitalism. The Marxist society is devoted to spreading the ideas of Marxism and to prepare ourselves, the youth, to take the future into our own hands as part of the struggle of the working class.

In addition to educating ourselves, we need to be side by side with the mass movement and be active with it. The Soton Marxists are involved in the Marxist Student Federation, fighting against youth unemployment, increase in tuition fees, abolition of student debt and other issues concerning the youth.

Our meetings are open to everyone. Feel free to come to any of them, we really appreciate people who are willing to listen to our ideas, agree or disagree with us.
